DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: In lines 9 and 26, page 15 "MRS" should be --MSR--.

In line 1, page 16 "MRS" should be --MSR--.

Appropriate correction is required.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 6 are indefinite because it is not clear to the examiner how the internal clock is being used as a delay monitoring clock and a comparison reference clock. It appears to the examiner from review of the specification and the drawings that the delay monitoring clock (FCLK) is a buffered version of the inverted external clock (CLK) and the comparison reference clock (Fb_D8) is a divided version of the internal clock (Rclk). It appears to the examiner from the wording of the claim that the delay monitoring clock and a comparison reference clock are one clock, however from review

of the specification and the drawings that they are in fact two separate clocks. Further, the delay monitoring clock does not appear to be related to the internal clock.

Correction or clarification is required.

5. Claim 2 recites the limitation "the comparison standard clock" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claims 3-5 and 7-20 are also rejected due to the limitations of the base claims and any intervening claims.

Allowable Subject Matter

6. Claims 1 and 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

7. Claims 2-5 and 7-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-20 would be allowable because the closest prior art of record fails to disclose a circuit as shown in Figure 5 wherein the circuit comprises: a master shift register (262) for selecting one of the sub delay chains (SDC) of the first delay line (220) and the second delay line (222) by responding to the shift control signal (CS_SM2MSR); and a slave shift register (264) for selecting one of the delay units (SDU) in the sub delay chain (SDC) selected by the master shift register according to the shift control signal (CS_SM2SSR) in combination with the rest of the limitations of the base claims and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
